

Chinook Music Store SQL Analysis Report

AnalystLab Africa Data Analytics Internship Program – Week 3

Project Title: Chinook Music Store SQL Analysis

Prepared by: Zainab Danjuma

1. Introduction

Background

The Chinook Music Store database is a relational database containing information about customers, employees, invoices, artists, albums, genres, tracks, and sales transactions.

This project uses SQL to analyze business performance and provide insights that can support strategic business decisions.

2. Business Problem

The management of Chinook Music Store requires insights into sales performance, customer purchasing behavior, employee performance, music preferences, and market performance. The objective is to identify revenue-generating customers, top-selling music categories, and high-performing countries to improve business growth and customer engagement.

3. Project Objectives

The objectives of this analysis were to:

- Determine the total revenue generated.
- Identify the total number of customers and employees.
- Analyze revenue by country.
- Identify the highest spending customers.
- Determine customers spending above the average.
- Identify the best-selling music genres.
- Identify the best-selling artists and tracks.

- Rank customers based on revenue using SQL window functions.
-

4. Tools Used

- PostgreSQL
 - DBeaver
 - SQL
 - GitHub
-

5. Methodology

The analysis was conducted using SQL queries on the Chinook relational database. Multiple tables were joined to retrieve meaningful business insights.

The SQL concepts applied include:

- SELECT
 - WHERE
 - ORDER BY
 - GROUP BY
 - HAVING
 - Aggregate Functions (SUM, COUNT, AVG)
 - INNER JOIN
 - Subqueries
 - Window Functions (RANK)
-

6. Summary Statistics

Metric	Result
Total Revenue	\$2,328.60
Total Customers	59
Total Employees	8

7. Business Questions and Findings

1. What is the total revenue generated by the music store?

Finding

The Chinook Music Store generated a total revenue of **\$2,328.60**.

2. How many customers purchased from the store?

Finding

The database contains **59 customers**, representing the active customer base.

3. How many employees support the business?

Finding

The company operates with **8 employees** responsible for customer support and sales activities.

4. Which countries generated the highest revenue?

Top Countries by Revenue

Country	Revenue
USA	\$523.06
Canada	\$303.96
France	\$195.10
Brazil	\$190.10
Germany	\$156.48

Insight

The **United States** is the highest-performing market, contributing the largest share of total revenue. Canada and France also represent strong markets for the business.

5. Who are the highest spending customers?

Top Customers

Customer	Revenue
Helena Holý	\$49.62
Richard Cunningham	\$47.62
Luis Rojas	\$46.62
Hugh O'Reilly	\$45.62
Ladislav Kovács	\$45.62

Insight

A small group of customers contributes significantly to overall revenue, highlighting opportunities for customer loyalty and retention initiatives.

6. Which music genres generate the highest revenue?

Genre	Revenue
Rock	\$826.65
Latin	\$382.14
Metal	\$261.36
Alternative & Punk	\$241.56

Insight

Rock music is the dominant genre, generating the highest revenue among all music categories.

7. Which tracks are purchased most frequently?

Track	Units Sold
The Trooper	5
Eruption	4
The Number of the Beast	4

Insight

These tracks represent the store's most popular songs based on purchase frequency.

8. Which artists generated the highest revenue?

The analysis identified several artists whose albums generated the highest sales revenue. Artists such as **Battlestar Galactica (Classic)**, **The Office**, and **Chico Buarque** ranked among the top revenue contributors.

Insight

The findings indicate that a relatively small number of artists account for a substantial portion of music sales, making them valuable assets for promotional campaigns and catalog management.

8. Overall Insights

- The Chinook Music Store generated **\$2,328.60** in total revenue.
 - The business serves **59 customers** with support from **8 employees**.
 - The **USA** is the highest-performing market by revenue.
 - **Helena Holý** is the highest-spending customer.
 - **Rock** is the best-selling music genre.
 - **The Trooper** is the most purchased track.
 - Revenue is concentrated among a limited number of customers, genres, and artists, suggesting opportunities for targeted marketing and customer retention.
-

9. Recommendations

- Expand promotional campaigns for Rock music to maximize sales.
 - Implement loyalty programs targeting high-value customers.
 - Focus marketing efforts on top-performing countries, particularly the USA and Canada.
 - Promote best-selling tracks and artists to sustain customer engagement.
 - Use customer purchase behavior to recommend similar artists and genres, encouraging repeat purchases.
-

10. Conclusion

This SQL analysis successfully explored the Chinook Music Store database using relational database concepts and advanced SQL techniques. By applying joins, aggregate functions, subqueries, and window functions, valuable insights into customer behavior, sales performance,

and music preferences were obtained. These findings can support data-driven business decisions aimed at improving revenue growth, customer retention, and market performance.
